1.Attributes in HTML

Attributes are used to give extra information about an HTML element. They are always written inside the opening tag.

example: [Google](#)

2.Class attribute

Hello

Welcome

This is content

3.id attribute

My Website

This is paragraph

4.title, lang, style, hidden attributes

Hover me

Red Text

5.Hyperlinks using href [Google](#)

Relative link [About Page](#)

6.target, download, mailto attributes

[Open Google](#)

[Relative link About Page](#)

6.target, download, mailto attributes

[Open Google](#)

[Download Notes](#)

[Send Email](#)

7. src and alt attributes  Nature Image

8. Image width, height & clickable image

 [Google Logo](#)

Home
