

## SAT Javascript Test 24 Jan 2026.

### 1) data types in Javascript:

\* Number, let a = 10;

\* BigInt, let b = 10n;

\* let c = "Hello"; string

\* Boolean, let d = true;

\* Null; let f = null;

\* undefined, let e;

\* Object → store multiple values.

### 2) Results using multiple if else statement:-

```
let mark = number(prompt("Enter your mark"));
```

```
if (mark >= 90) {
```

```
    console.log("Grade A");
```

```
}
```

```
else if (mark >= 75) {
```

```
    console.log("Grade B");
```

```
}
```

```
else if (mark >= 50) {
```

```
    console.log("Grade C");
```

```
}
```

```
else {
```

```
    console.log("Fail");
```

```
}
```

output:-

mark = 76

Grade B

### 3) Different types of Operators:-

- \* Arithmetic operators
- \* Assignment operators
- \* Comparison operators
- \* Logical operators
- \* Ternary operators.

#### 1) Arithmetic operators:-

\* It is used for calculation

Example:  $+$ ,  $-$ ,  $*$ ,  $\%$ ,  $/$

```
let a = 10, b = 5;
```

```
console.log(a+b);
```

#### 2) Assignment operators:-

\* assigning the value to the variables.

\*  $=$ ,  $+=$ ,  $-=$ ,  $*=$ ,  $/=$

Example:

```
a += 5
```

#### 3) Comparison operators:-

\* It is used for compare two values.

\*  $>$ ,  $<$ ,  $<=$ ,  $>=$ ,  $==$ ,  $===$ ,  $!=$

Example:

```
let a = 5, b = 10;
```

```
console.log(a > b);
```

#### 4) Logical operators:

\* It is used to check conditions:

\* &&, !

Example:

```
console.log(a > 5 && b < 10);
```

#### 5) Ternary operator:

\* It is a short form of if else.

Example:

```
let result = (a > b) ? "A is bigger" : "B is bigger";
```

```
console.log(result);
```

#### 4] Print the shipping cost:

```
let amount = 450;
```

```
let shippingCost;
```

```
if (amount > 500) {
```

```
    shippingCost = 0;
```

```
    console.log("Free shipping");
```

```
}
```

```
else {
```

```
    shippingCost = amount * 0.02;
```

```
    console.log("shipping cost", shippingCost);
```

```
}
```

output:  
shipping cost = 9

$$\frac{2}{100} = 0.02$$

5) factorial using dowhile loop:

```
let n = 5;
```

```
let fact = 1;
```

```
do {
```

```
  fact = fact * n;
```

```
  n --;
```

```
} while (n > 0);
```

```
console.log(fact);
```

output

120

b) Armstrong number using function:

```
function Arm(num) {
```

```
  let sum = 0;
```

```
  let temp = num;
```

```
  while (temp > 0) {
```

```
    let digit = temp % 10;
```

```
    sum = sum + digit * digit * digit;
```

```
    temp = (temp - digit) / 10;
```

```
  }
```

```
  if (sum === num) {
```

```
    console.log("Armstrong number");
```

```
  }
```

```
  else {
```

```
    console.log("not an Armstrong strong");
```

```
  }
```

```
}
```

```
Arm(153);
```

Output:

Armstrong number

7) Palindrome or not using Function:

```
function palindrome(str){
```

```
    let r = "";
```

```
    for(let i = str.length - 1; i >= 0; i--){
```

```
        r = r + str[i];
```

```
    }
```

```
    if (str === r){
```

```
        console.log("Palindrome");
```

```
    }
```

```
    else {
```

```
        console.log("Not a Palindrome");
```

```
    }
```

```
    palindrome("APPA");
```

output  
// Palindrome.

8) Print Fibonacci Series:

```
let n = 10;
```

```
let a = 0;
```

```
let b = 1;
```

```
let count = 2;
```

```
console.log(a);
```

```
console.log(b);
```

```
while (count < n){
```

```
    let c = a + b;
```

```
    console.log(c);
```

```
    a = b;
```

```
    b = c;
```

```
    count++;
```

output ::

0

1

1

2

3

5

8

13

21

34.

9) Prime no series using while loop:-

```
let num = 2;
```

```
while (num <= 20) {
```

```
  let f = 0;
```

```
  for (let i = 2; i <= num; i++) {
```

```
    if (num % i === 0) {
```

```
      f = 1;
```

```
      break;
```

```
    }  
  }  
  if (f === 0) {
```

```
    console.log(num);
```

```
    num++;
```

```
  }
```

Output:

2

3

5

7

11

13

17

19

10) Factorial using Recursion:

```
function fact(n){  
  if (n == 0) {  
    return 1;  
  }  
  else {  
    return n * fact(n - 1);  
  }  
  console.log (fact(5));  
}
```

Output :-

120
