```

## 1. Style an HTML snippet using different CSS selectors

- Element selector -> targets HTML tags like p, h1
- Class selector -> targets elements with a class name
- ID selector -> targets a single unique element

css is used to style a web page

*Lorem ipsum dolor sit amet consectetur adipisicing elit. Quibusdam, veniam?*

### Movie List

- 24
- varanam aayiram
- puli

## id used for unique elements

### Box Section

This content is inside a box. The border and spacing come from the .box class.
