

Day 8 – Assignment :

The screenshot shows a Python IDE with a dark theme. The top toolbar includes icons for file operations and a search icon. The editor has tabs for 'ay5A.py', 'day7.py', 'day9.py', and 'day8.py'. The 'day8.py' tab is active, displaying a Python script. The script prompts the user to enter three subjects (s1, s2, s3) and a mark. It then uses a series of if-elif-else statements to determine the subject combination group based on the subjects and the mark. The bottom panel shows the 'TERMINAL' tab with the command 'python day8.py' and its output, which matches the script's logic for the input 'che', 'maths', 'phy', and '98'.

```
Python
ay5A.py day7.py day9.py day8.py
day8.py > ...
1 s1 = input("Enter Subject 1: ")
2 s2 = input("Enter Subject 2: ")
3 s3 = input("Enter Subject 3: ")
4
5 mark = int(input("Enter Mark: "))
6
7 if s1 == "che" and s2 == "maths" and s3 == "phy" :
8     if mark >= 95 :
9         print("Doctor Group")
10    elif mark >= 85 :
11        print("Engineering Group")
12    elif mark > 75 :
13        print("Arts and Science")
14    else:
15        print("other Group")
16 else:
17    print("Invalid Subject Combination")

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS
● PS D:\SLA\Python> python day8.py
Enter Subject 1: che
Enter Subject 2: maths
Enter Subject 3: phy
Enter Mark: 98
Doctor Group
