

Inheritance

* Inheritance is an OOP concept in which one class (child class) acquires the properties and methods of another class (parent class). It promotes code Reusability, maintainability, and easy extension of existing classes.

Types of Inheritance in Python :-

chart

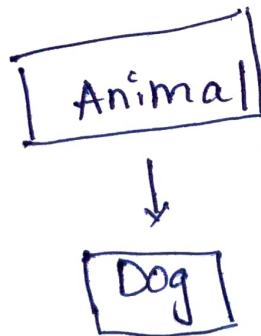

1. Single Inheritance.

One child class inherits from one parent

class.

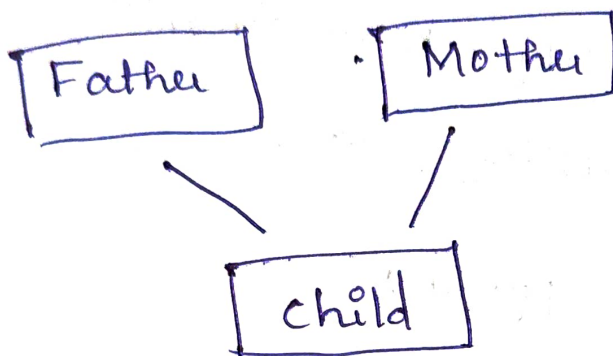

Diagram:

2. Multiple Inheritance:

* One child class inherits from more than one parent class

Diagram

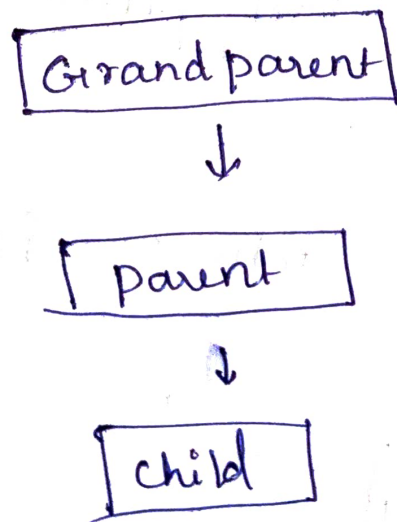

3] Multilevel Inheritance.

* A class inheritance from another child

Class.

Diagram:

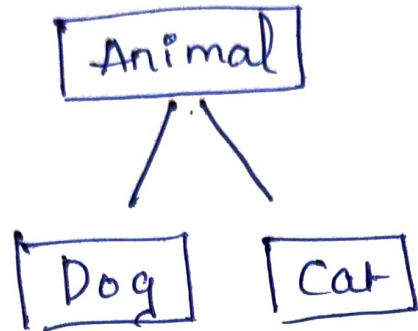

4. Hierarchical Inheritance.

multiple child classes inherit from one

parent class.

Diagram:

5. Hybrid Inheritance.

Hybrid inheritance is a combination of two or more types of inheritance.
